Medical Monitors and equipment

## Pulse Oximeters from Infinium Medical

Pulse oximeters are a critical tool for measuring a patient's blood oxygenation, and at Infinium Medical, we have accurate, lightweight patient monitors that will reliably provide this crucial data you need when you need it. Our OXCYON III vital signs monitor measures SpO2, pulse rate, blood pressure, and more, and is ideal for use in a wide array of medical settings, including ERs, ORs, ICUs, and patient wards. Additionally, the OXCYON III is suitable for adult and pediatric patients or newborns. While the OXCYON III is one of the most advanced pulse oximeters on the market, you won't need to strain a tight budget to buy it for your healthcare facility. At Infinium Medical, we offer our pulse oximetry monitors at affordable prices because we believe that every doctor, nurse, and technician should have access to durable, state-of-the-art medical equipment to provide their patients the best care possible.

OXCYON III pulse oximeters from Infinium Medical offer many other benefits, including:

- Small, compact design for easy portability
- A long-lasting battery that can provide more than two hours of dependable, continuous use
- A large, easy-to-read LED screen that can simultaneously display SpO2, blood pressure, pulse, and temperature
- Real-time thermal recorder for accurate data on demand
- And more

Additionally, the OXCYON III is ISO-certified, and has been tested and retested by medical professionals to ensure it is both accurate and reliable.
